DETAILED ACTION

Claim Status

1. Claims 1-10 are pending.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Switkes et al., American Vacuum Society in view of Niki et al., U.S. Patent No. 5,326,675.

Switkes teaches an immersion exposure method comprising contacting water as the immersion liquid, between the projection lens and the photoresist. The photoresist is then exposed to radiation and developed. Switkes does not teach that the photoresist has a shield layer over the photoresist.

However, Niki teaches a radiation-sensitive composition with an acidic coating layer applied thereon (shield layer). The acidic coating layer is applied is not sensitive to radiation and does not dissolve the radiation-sensitive layer. However, the acidic coating layer is dissolved by a tetramethylammonium hydroxide developer (col. 13, lines 35-38). The acidic coating layer shields harmful components that inhibit the reaction (col. 4, lines 5-15). Therefore, it would have been obvious to one of ordinary skill in the

Art Unit: 1795

art to apply an acidic coating layer to the photoresist of Switkes to protect the photoresist from deleterious effects of exposure to atmospheric components as taught by Niki.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CONNIE P. JOHNSON whose telephone number is (571)272-7758. The examiner can normally be reached on 7:30am-4:00pm Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 571-272-1526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
